

AZURE TRAINING PROGRAM

MEET YOUR MENTOR

Abhishek Agrawal, a Microsoft Certified Azure Data Engineer with over 7 years of immersive hands-on experience, is a catalyst for career transformations in Azure Cloud. A distinguished NIT Raipur graduate, he specializes in Azure Data Factory, Databricks, Synapse Analytics, and more.

Abhishek's pedagogy seamlessly integrates theoretical knowledge with practical insights, offering a holistic learning experience in data engineering.

Renowned for propelling hundreds of individuals into thriving Azure Cloud careers, Abhishek's teaching philosophy revolves around real-world projects, daily practice, and a steadfast focus on practical implementation.

His commitment extends beyond conventional learning, providing comprehensive support for career transitions, interview preparation, and perpetual access to class recordings.

Embark on a transformative learning journey with Abhishek, where his passion for immersive education ensures that every concept taught is immediately applicable and relevant.

Join his dynamic classes for a hands-on exploration of the world of data engineering, cloud solutions, and the pathway to unparalleled career success. Let Abhishek guide you in constructing your success story in the realm of data engineering.

WHAT SETS US APART?

Interactive Community Session

Question & Answer Sessions

Real-time Training with Practical Experience

Certification Support (AZ-900, DP-900, AZ-203)

Professional Resume Building Assistance

Job Profile Optimization

Learning from Scratch

Zero Prerequisites

Lifetime Access to Course Recordings

Course Completion Certificate

Comprehensive Interview Questions
from 100+ Companies

COURSE - DATA ENGINEERING

This Course is ideal for:

- Individuals who are new to Azure, requiring zero prerequisites.
- Beginners in the field of data analysis.
- Those eager to learn Azure Data Factory (ADF), Databricks, and Synapse.
- Professionals currently working with Informatica, SSIS, and Power BI, seeking to transition into Azure.
- Data analysts looking to make a switch to Azure.

COURSE - DATA ENGINEERING

- 1)** Understanding Azure basics: subscription, resource group, and management group creation, and an introduction to Azure Data Factory (ADF).
- 2)** Exploring Blob and Data Lake Gen2 storage.
- 3)** Integration runtime, linked services, data sets, pipelines, and activities in ADF. Copying data for a single file.
- 4)** Advanced copy data activities: Recursive, wildcard, file listing, mapping, user properties, and various settings.
- 5)** Implementing For Each loop for copying multiple files.

COURSE DURATION - 2 MONTHS

- 6)** Copying data to SQL Server: upsert, pre-copy script, and AutoCreate table options.
- 7)** Lookup activity and handling multiple files using lookup.
- 8)** Delta load strategy for a single file.
- 9)** Delta load for multiple files.
- 10)** Git integration and Azure DevOps collaboration.
- 11)** Overview of Azure Databricks integration.
- 12)** Delta table and properties of Delta Lake.

- 13) Azure Active Directory, tenant, subscription, and user management.
- 14) Advanced activities: If-else, metadata, and web activities.
- 15) Triggers: event-based, scheduled, and tumbling window triggers.
- 16) Azure Synapse: SQL, serverless pool, and dedicated pool.
- 17) Data flow concepts: mapping, wrangling, and processing CSV, JSON, and XML with Pyspark, Scala, and Python.
- 18) Azure Key Vault and shared integration runtime.

- 19) JDBC connector and secret scope in Azure Databricks.
- 20) Fact and dimension
- 21) star, snowflake schemas, and data modelling.
- 22) Creating stored procedures for data modelling.
- 23) Sending email alerts using Logic App.
- 24) Advanced data processing with CSV, JSON, and XML in Pyspark, Scala, and Python.
- 25) Delta Lake principles and best practices.

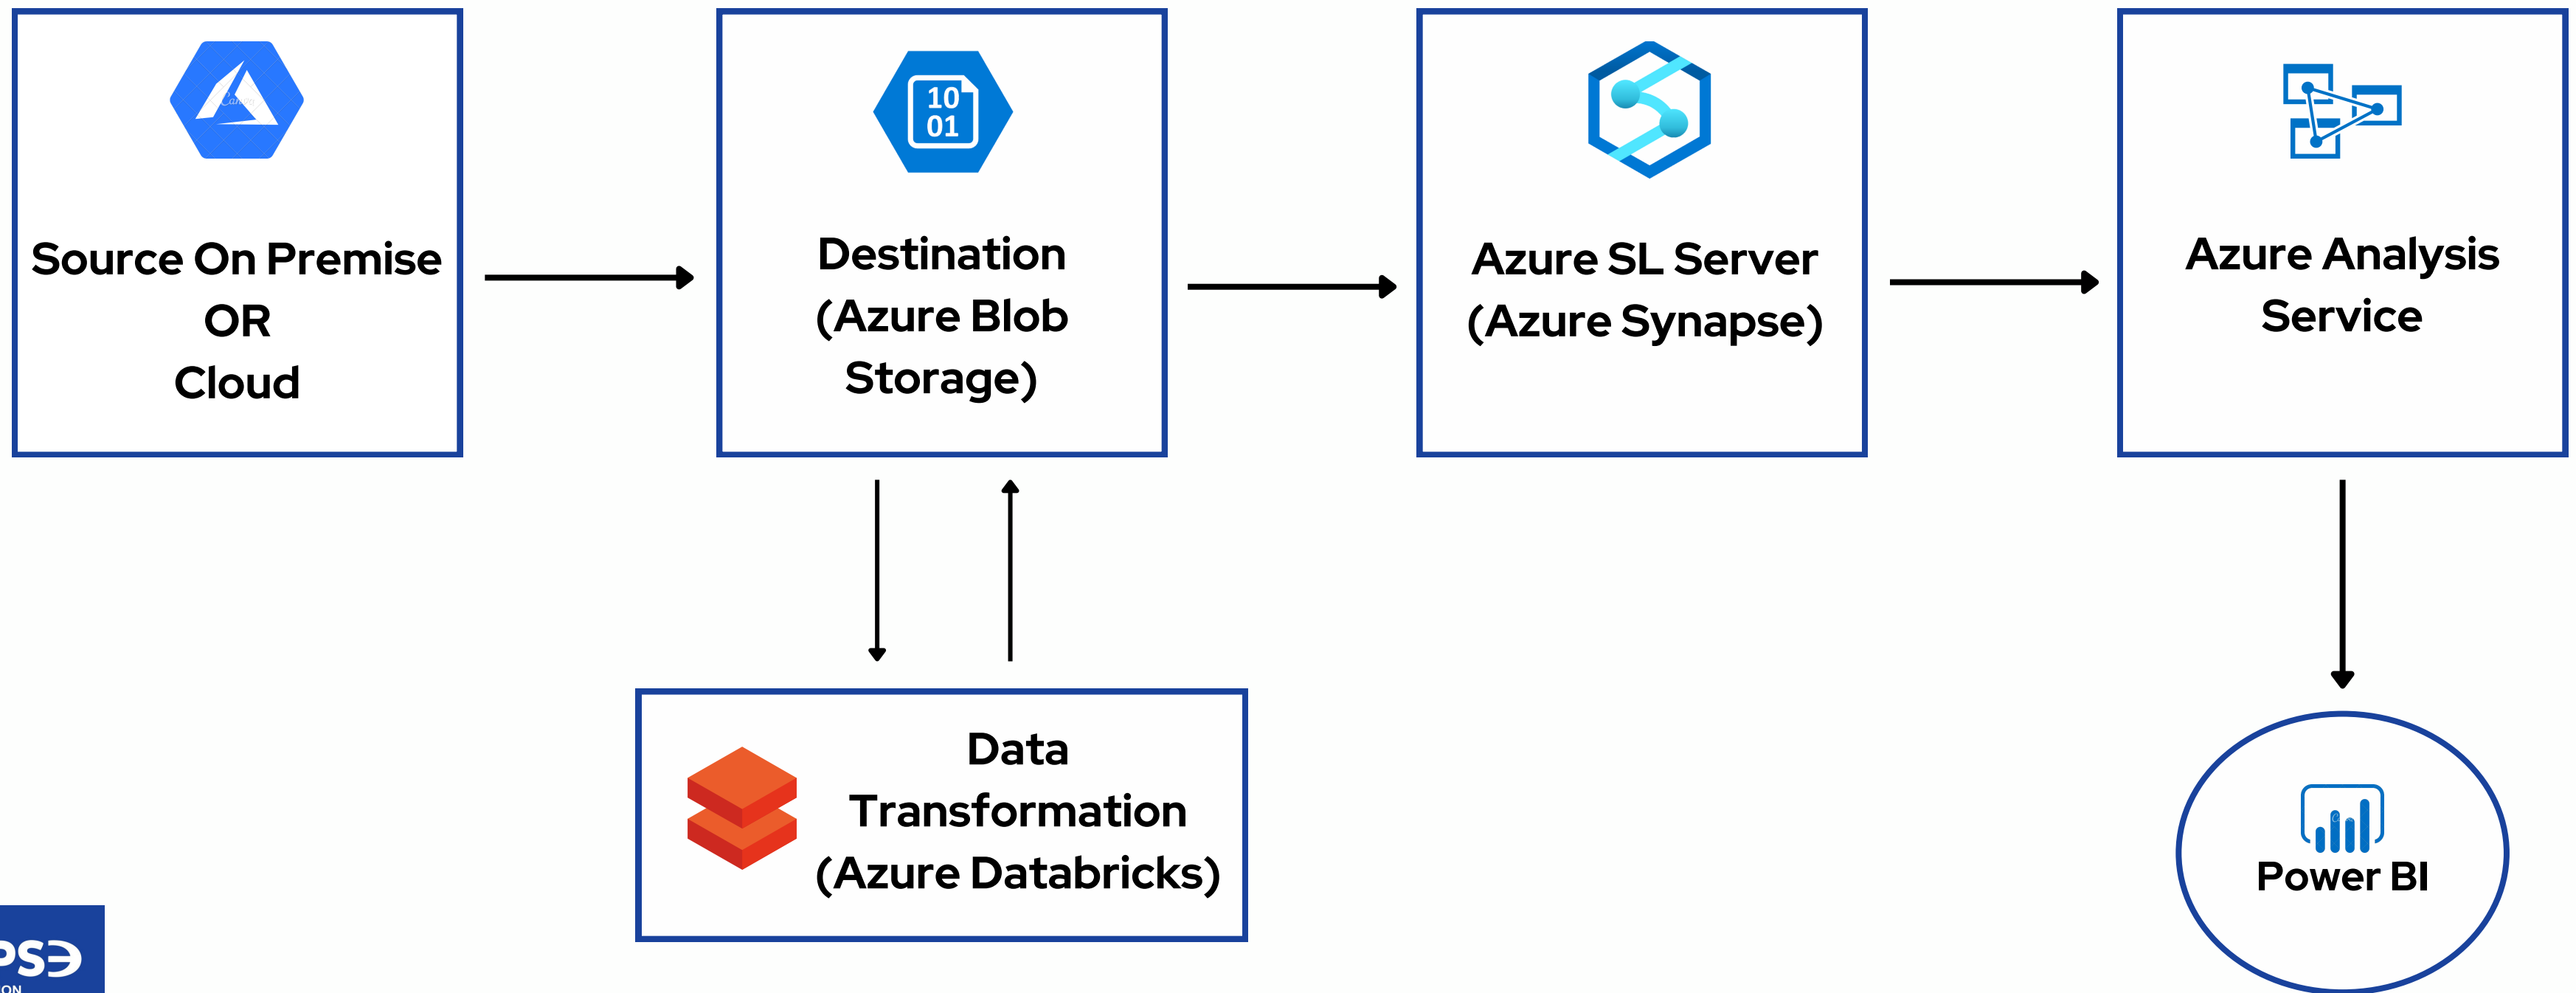

Includes Resume Building, Mock Interview & Certificate Assistance

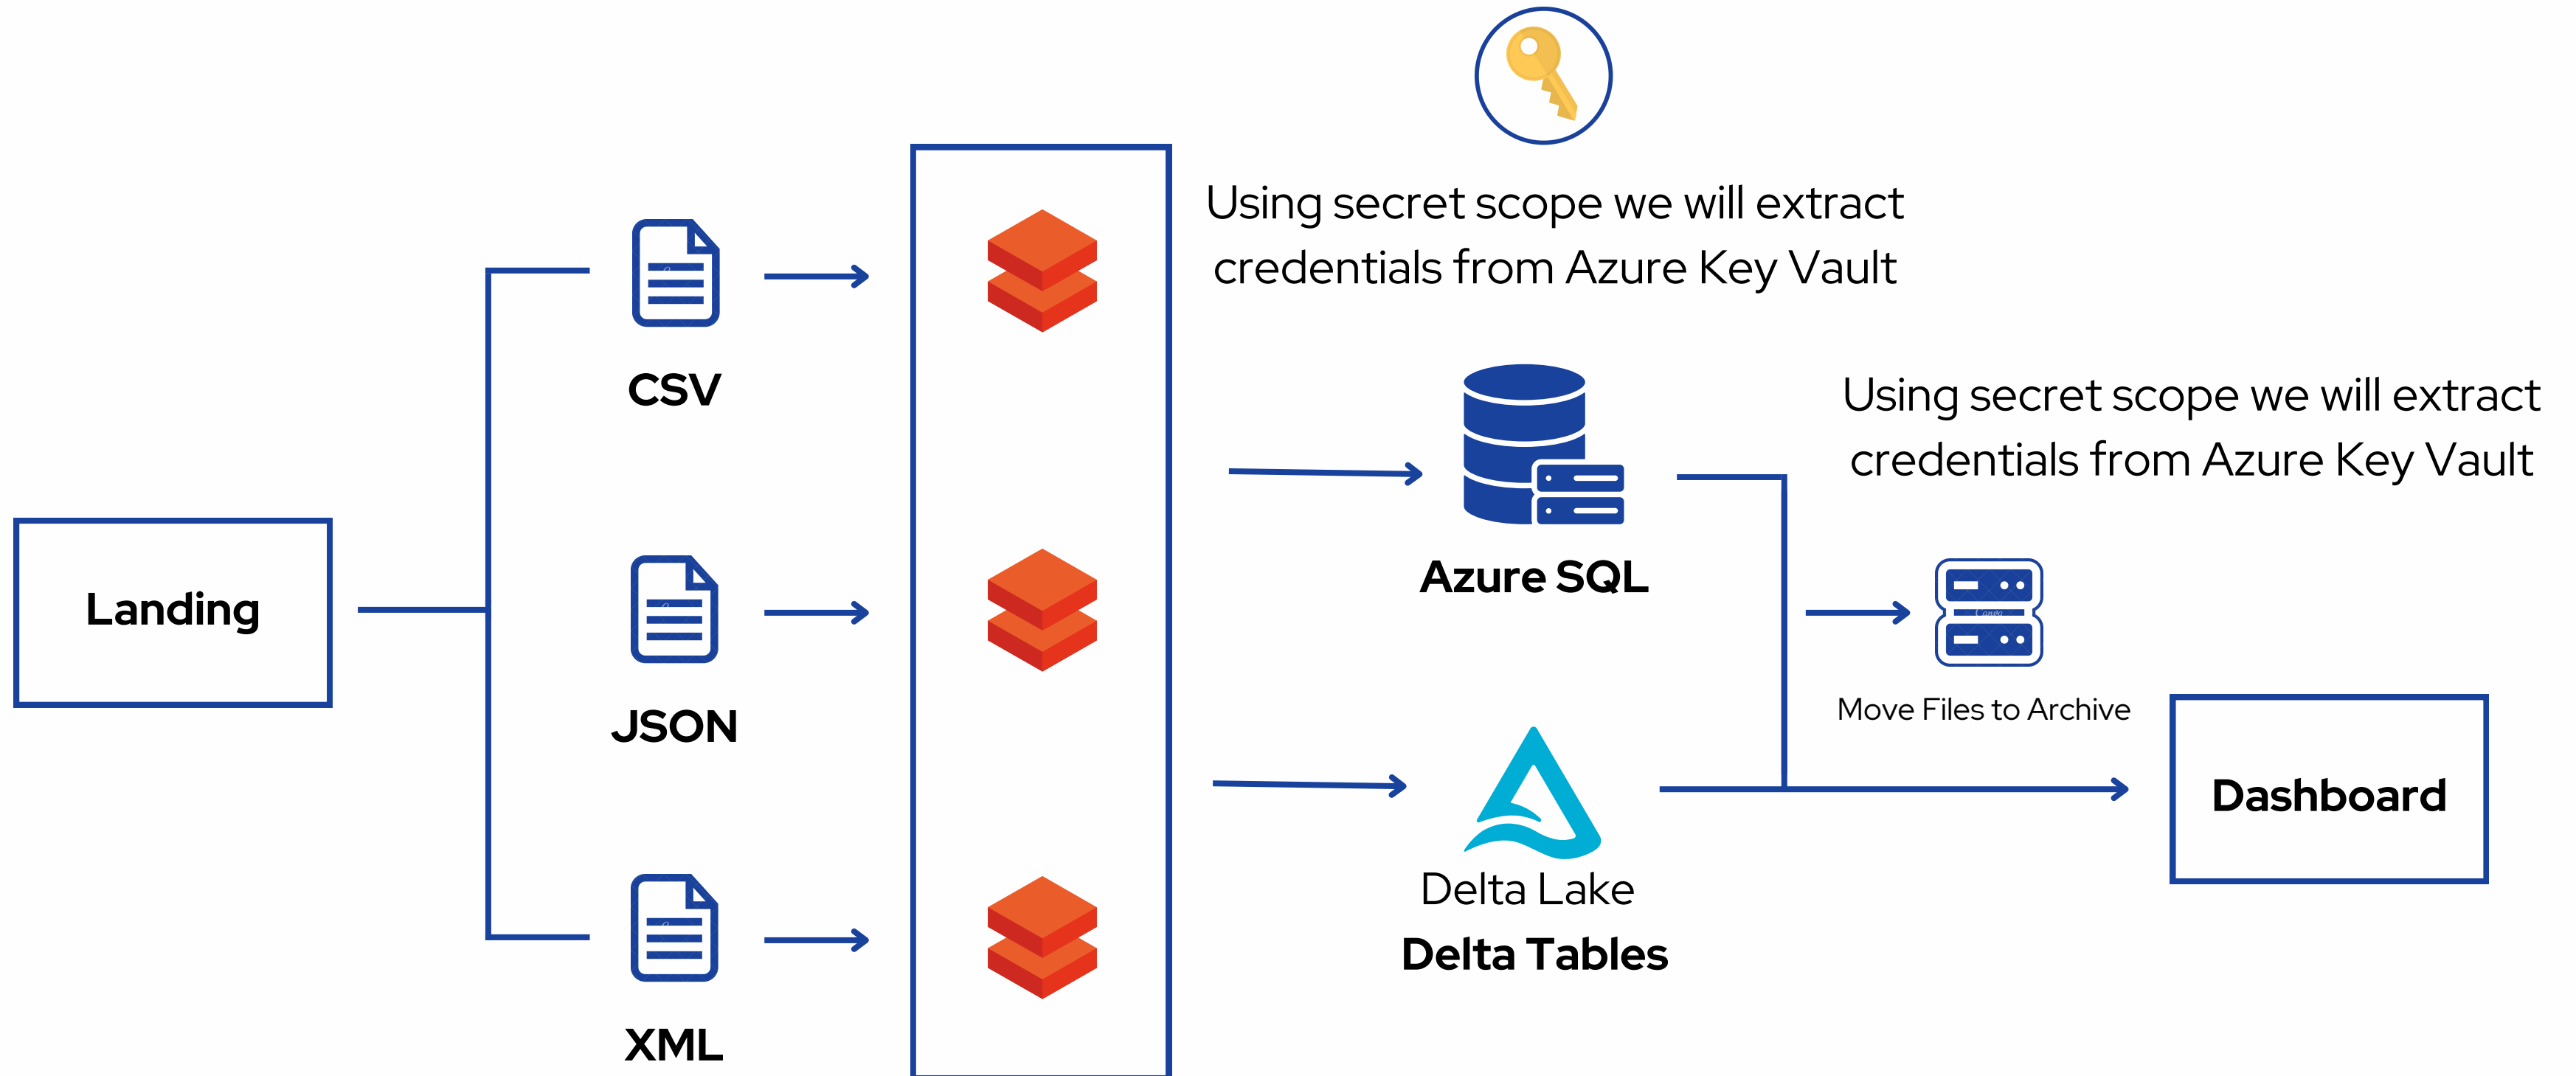

Architectures Covered Within the Course are as Follows

COURSE FEES - RS 8,999

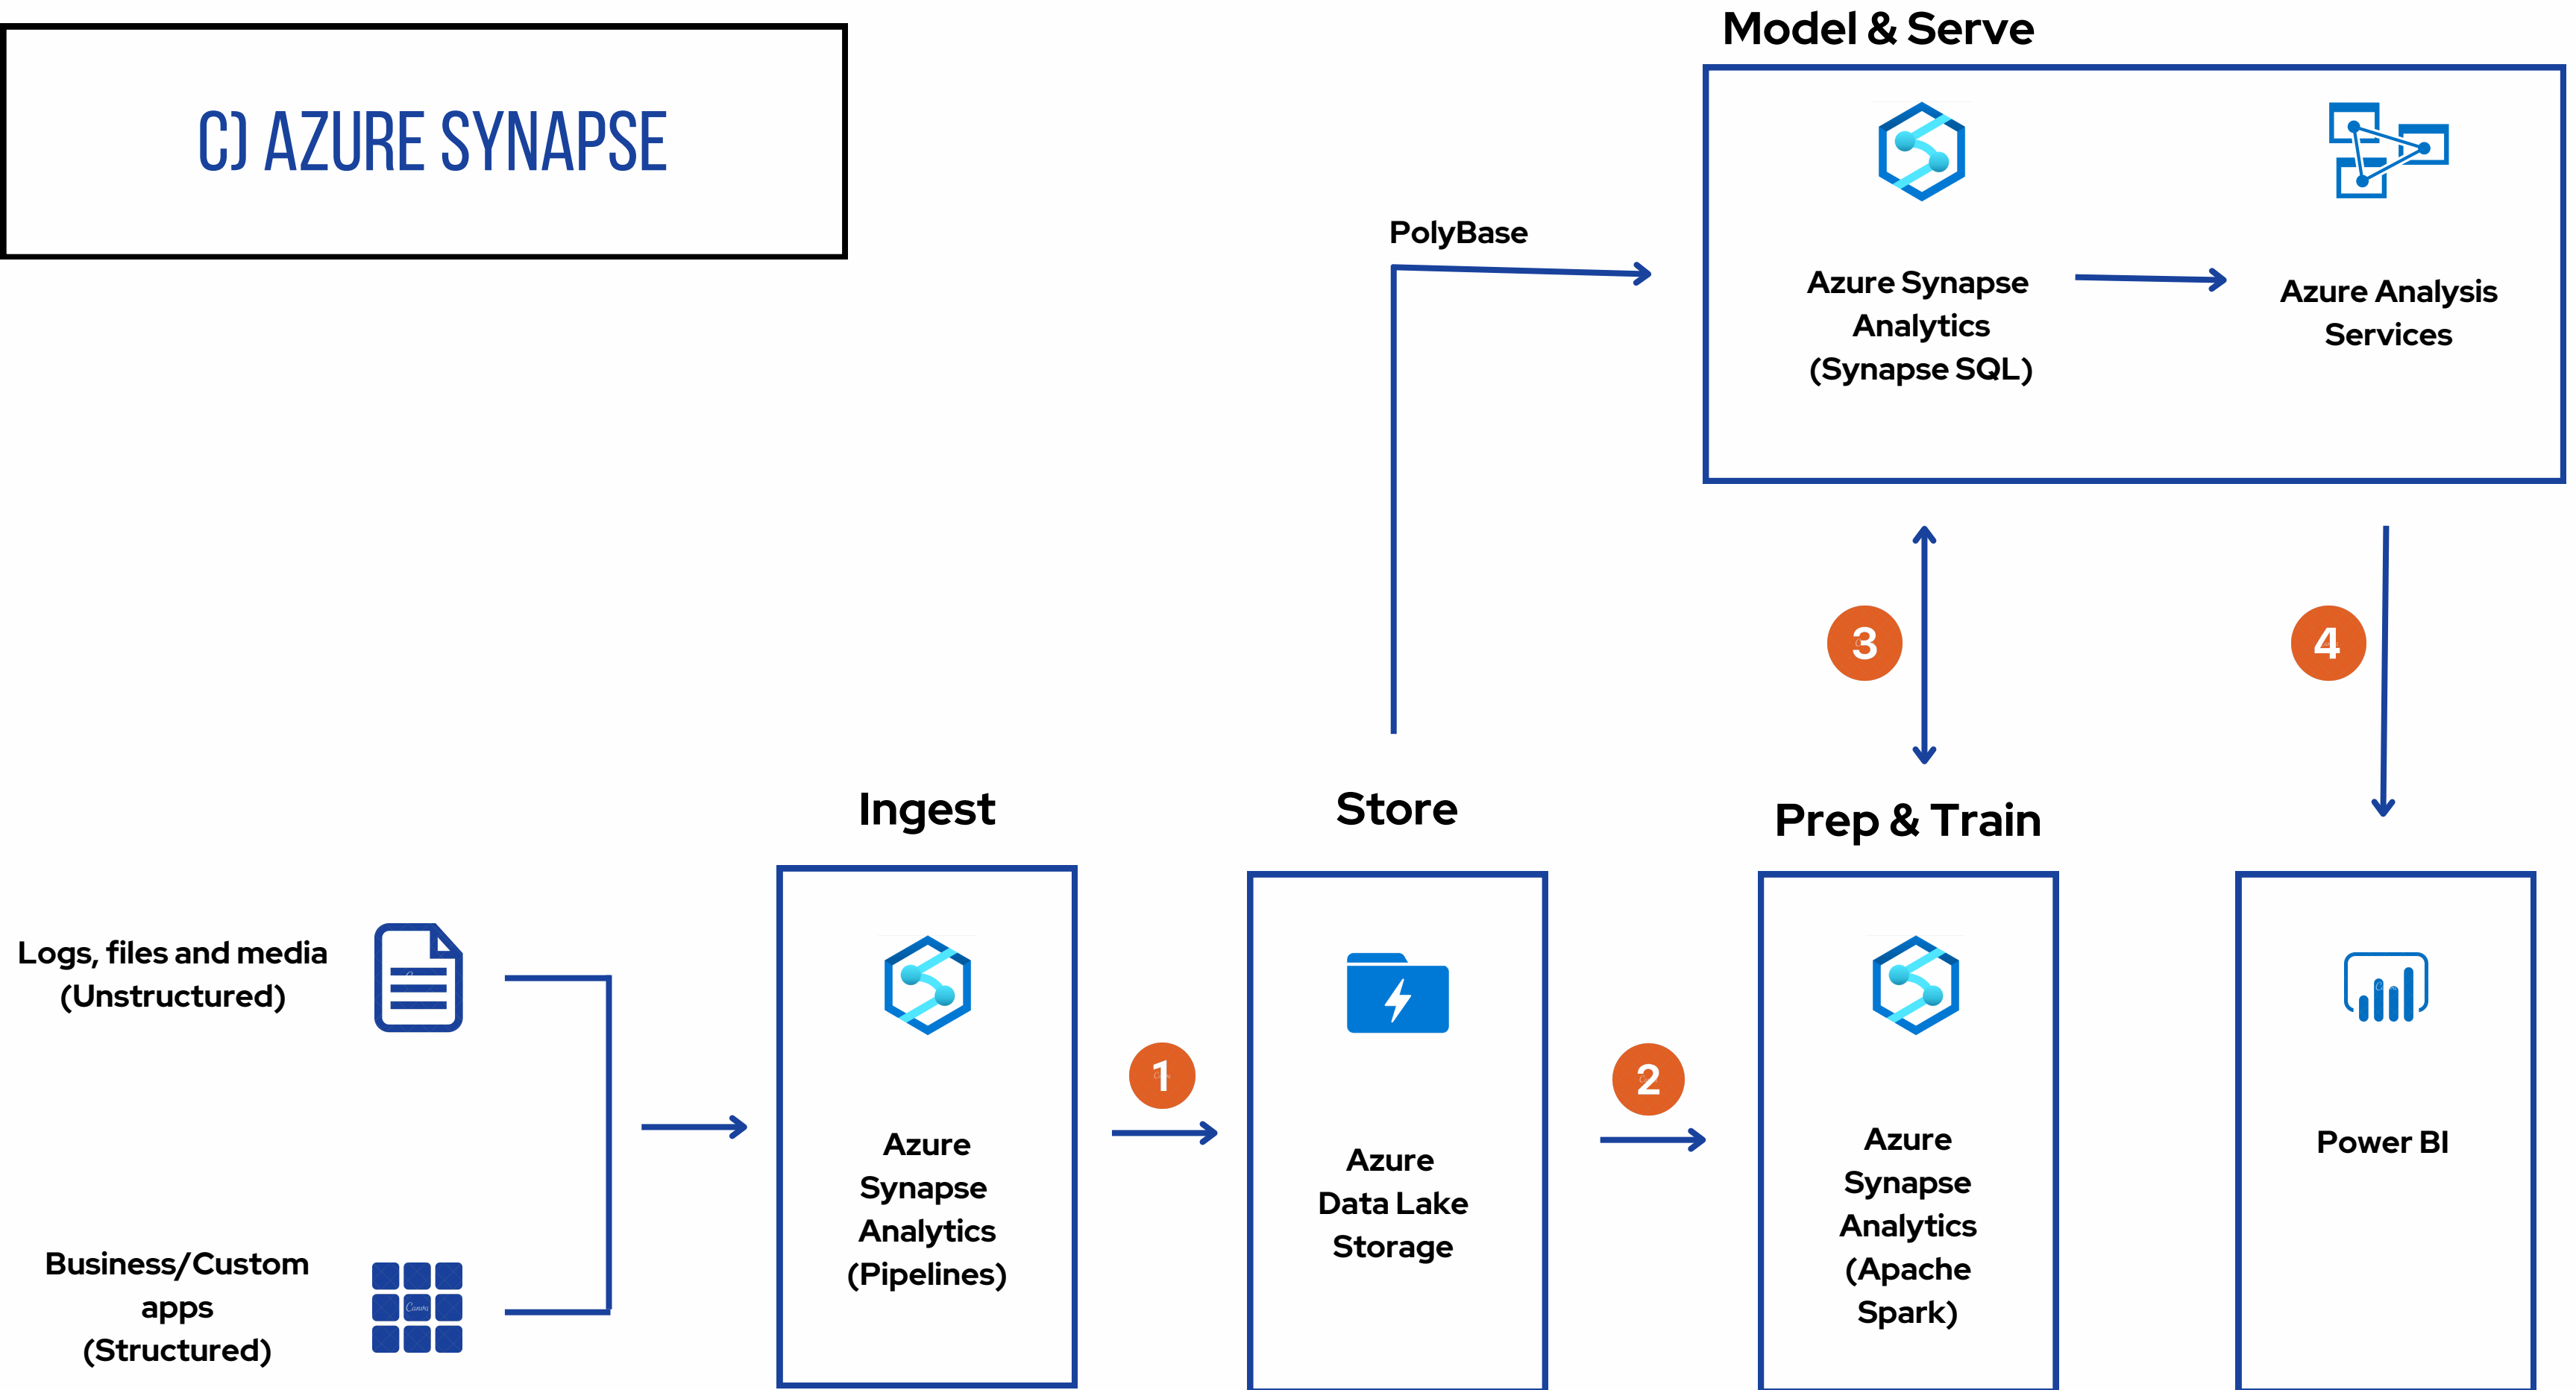

A) AZURE DATA FACTORY

B) AZURE DATABRICKS

C) AZURE SYNAPSE
